## FJ CLOCK AND FJ CLOCK BLACK

TIMELESS AND STREAMLINED

The FJ Clock was designed as a part of the interior of the New York United Nation Trusteeship Council Chamber in 1950 and it captures the essence of Juhl's design aesthetic.

The concave shape complementing the natural qualities of the teak and ash wood and the numberless aluminum dial captures his flair for clever minimalism. It is crafted with a unique precision that offers a harmony that underlines what a work of art the FJ Clock truly is. Each FJ Clock is unique, displaying its own wood pattern.
