

SPRING
THE SPACE WITHIN

Designed by one of Denmark's most renowned architects, Jørn Utzon, these mouth blown glasses are inspired by pure materials and fluid space.

Stackable and able to be tilted on its side as a cognac glass, this glass is both poetry and function, allowing for storage in small spaces and elegant drinking. Designed in 1949 long before Utzon pioneered his organic shapes for his Opera house the glass was decades ahead of its time making it a timeless classic today.

Material
Handmade drinking glass

Dimensions
H8 D9 cm
