

TREPAS
TINGE OF INFINITY

Made of solid copper, brass and stainless steel, Trepas, designed by Peter Karpf in 1966, is a system of tea light holders.

Searching for the perfect vessel for this simple and universal candle, Karpf created a system of holders that can be positioned in countless ways.

As the living flame within reflects off of the polished metals a “tinge of infinity” is created as its reflections bounce between holders.

Material

Copper, brass and stainless steel

Dimensions

H3 D4 cm
