**FLOW**

A PLAY OF LIGHTS AND SHADOWS

Vibeke Rytter is an architect, painter, and scientific researcher in materials and ceramics. Rytter has received several awards and design prizes over the decades, with her works being represented in esteemed museums around the world - one permanently exhibited in Design Museum, Denmark.

Inspired by the brick structure of Grundtvig's Church in Copenhagen, a rare example of expressionist architecture in Denmark, and the ripples in the nearby lakes, Vibeke Rytter created Flow.

**Material**

Porcelain

**Dimensions**

Teardrop H30,60 cm

Drop H17,20 cm

Bubble H17,00 cm
